

Subscribing to Galaxy Bundles in Vision or Studio Vision (pre 3.0)

Subscribing forms a communications link between Galaxy Bundles & Vision (or Studio Vision), enabling Vision to display a MIDI device's programs by name rather than just by number. In addition, it allows the display of program numbers in a way that reflects the device's own numbering scheme, A7, c12 or program numbers 11-88 for example. These names are available in Vision wherever programs and notes are used; the List and Graphic edit windows, the Control bar, and places like the Metronome Sound and Select dialog boxes.

1. In Galaxy, make sure you have successfully created a Bundle from at least one of your MIDI devices and saved it inside the Galaxy folder.
2. In Vision, open the Instruments Window from the Windows menu. In the upper left hand corner are two small square boxes. Click on the one with the triangle in it which produces a drop down menu and select "Make from Studio Setup". Then select "Make". Select "Save as Setup" from the File menu if you wish this to be the Instrument Setup for Vision in the future.
3. Open the Names Window from the Windows menu. Select an instrument by clicking on the instrument names in the far left column.
4. In the upper left hand corner of the Names Window are two small square boxes. Click on the one with the triangle inside it which produces a drop down menu and select "Subscribe" from the menu.
5. Navigate to the Galaxy folder that contains the appropriate bundle for the instrument you wish to subscribe to and select the "Subscribe" button on the right. When you return to the Names Window you will notice the Bundle you have subscribed to listed in the far right column.
6. Use the Dev./ Name list column to choose the bank that contains the names appropriate to the instrument (or instrument channel) for that line. Select "Save as Setup" from the File menu if you wish this to be the Names Setup for Vision in the future.
7. In the Control Bar's lower left corner are the Icons for the Thru Instrument and Current Program pop up menus. In the box next to the Keyboard Icon select a channel from a MIDI device you have Subscribed to. In the box next to the Trumpet Icon select a program and you will see the programs displayed are now names instead of numbers.
